TABLE 9 - OFFENSES AND ARRESTS GROUPED BY TYPE OF OFFENSE

These three groups are titled and defined as follows:

PERSON-TO-PERSON: Offenses where the victim is present and the act is violent, threatening, or has the potential of being physically harmful.

PROPERTY: Offenses that involve taking something of value by theft or deception, or the destruction of property.

REGULATORY-BEHAVIORAL: Offenses that violate laws relating to conduct or responsibility. Although not necessarily violent or property offenses in themselves, they may contribute to other offenses.

. These three groupings of offenses by type are unique to Oregon

. Past local and national reports regarding person-to-person (violent) and property offenses have been based solely on Index Offense categories

. Exact comparable data is not available on a national scale

SECTION 6 - AGENCY SUMMARY AND DETAIL TABLES

This section provides the following information:

1. A summary of the annual crime report information for each department and each county.

2. A detailed report by crime category of the annual crime report information for each department and each county.

The summary tables provide a comparison between 1982 and 1983 data.

The summary information is located on the upper pages and the detailed information by crime category for the same departments and counties is located on the facing lower pages.

The counties are listed in alphabetical order with all reporting departments in each county listed in alphabetical order within the county.

KEY TO FORMAT ABBREVIATIONS

Months of Reporting.	The number of months reported by each individual agency.
Officer Assaults	The number of reported assaults on police officers during the reporting period.
OFF.	The number of actual verified offenses or attempts as set forth by OUCR guidelines and definitions.
ARR.	The number of arrests made during the reporting period. (Includes any arrests made during this period for offenses reported prior to 1/1/83. Includes persons cited, summoned, and notified as well as those taken into physical custody.)
CLR.	The number of offenses cleared by arrest or exceptionally during the reporting period. (Includes any clearances made during this time for offenses reported prior to 1/1/83.) These are counts of offenses cleared, not persons arrested.

NOTE: When counting arrests, only those arrests which are made for an agency's "own" cases are counted for OUCR purposes. For example, if Agency A makes an arrest on a warrant for Agency B, Agency A does <u>not</u> count it. For this reason, the number of arrests shown in this report will not necessarily agree with the statistics within a department which may show <u>all</u> arrest activity.

STATISTICAL METHODS

CALCULATION OF CRIME RATES

Quite often it is desired to compare the volume of crime occurrence, either totally or by individual offense, over a period of time for a selected group of agencies or jurisdictions. The geographical area being studied will undoubtedly consist of law enforcement agencies of various strengths and serving widely varying sizes of population. An agency equalizing factor must be developed, or in other terms, a common denominator is needed. To arrive at a valid comparison, the concept of rate is utilized.

The crime rate is defined as the number of offenses occurring per 100,000 population over a period of one year. The common denominator for any community, county, district, or state is obtained by dividing the population represented by 100,000. Once this denominator is determined, it becomes a constant until such time as the population of the community, county, district or state changes appreciably. The crime rate can be calculated then by dividing the number of offenses by the denominator.

a. Population ÷ 100,000 = common denominator

b. Number of offenses ÷ common denominator = crime rate

Example:

Agency A serves a population of 50,000 and experienced a total of 2,500 Index offenses in 1983.

Index Crime Rate -

a. $\frac{50,000 \text{ (population)}}{100,000} = 0.50$ (common denominator)

b. $\frac{2,500 \text{ (number of offenses)}}{0.50 \text{ (common denominator)}} = 5,000$ (crime rate)

Therefore, the Index crime rate for Agency A in 1983 was 5,000 offenses per 100,000 population.

Example:

Agency B serves a population of 128,750 and experienced a total of 13,500 robbery offenses in 1983.

Robbery Rate -

a. $\frac{128,750 \text{ (population)}}{100,000} = 1,2875$ (common denominator)

b. $\frac{13,500 \text{ (number of offenses)}}{1.2875 \text{ (common denominator)}} = 10,485$ (crime rate)

The robbery rate for Agency B in 1983 was 10,485 offenses per 100,000 population

INTRODUCTION

This report for 1984 marks the beginning of a slight change in presentation from reports of prior years. Information in the Summary, Section 1, is presented in a new set of offense groupings, instead of "Index - Part I and Part II" offenses as in the past.

The remaining sections of the report are still oriented toward the older categories for historic and comparative purposes.

We believe this change will contribute to the usefulness of the report to its readers. If you, as a user of crime statistics in Oregon, have comments or questions about this change in approach, or other aspects of this report, we would be pleased to hear from you.

The new offense groupings are described below.

CRIMES AGAINST PERSONS: Criminal offenses where the victim is present and the act is violent or threatening or has the potential of being physically harmful.

- Willful homicide
- Negligent homicide
- Forcible rape
- Other sex crimes
- kidnapping
- Blackmail-Extortion
- Robbery
- Purse-snatch
- Aggravated assault
- Simple assault

CRIMES AGAINST PROPERTY: Offenses that involve taking something of value by theft or deception or the destruction of property.

- Burglary

- Motor vehicle theft
- Arson
- Forgery
- Fraud

SECTION 6 - AGENCY SUMMARY AND DETAIL TABLES

This section provides the following information:

1. A summary of the annual crime report information for each department and each county.

2. A detailed report by crime category of the annual crime report information for each department and each county.

The summary tables provide a comparison between 1983 and 1984 data.

The summary information is located on the upper pages and the detailed information by crime category for the same departments and counties is located on the facing lower pages.

The counties are listed in alphabetical order with all reporting departments in each county listed in alphabetical order within the county.

KEY TO FORMAT ABBREVIATIONS

Months of reporting.	The number of months reported by each individual agency.
Officer assaults	The number of reported assaults on police officers during the reporting period.
OFF.	The number of actual verified offenses or attempts as set forth by OUCR guidelines and definitions.
ARR.	The number of arrests made during the reporting period. (Includes any arrests made during this period for offenses reported prior to 1/1/84. Includes persons cited, summoned, and notified as well as those taken into physical custody).
CLR.	The number of offenses cleared by arrest or exceptionally during the reporting period. (Includes any clearances made during this time for offenses reported prior to 1/1/84). These are counts of offenses cleared, not persons arrested.

SPECIAL NOTES: When counting arrests, only those arrests which are made for an agency's "own" cases are counted for OUCR purposes. For example, if Agency A makes an arrest on a warrant for Agency B, Agency A does <u>not</u> count it. For this reason, the number of arrests shown in this report will not necessarily agree with the statistics within a department which may show <u>all</u> arrest activity.

Percentage of change for the Oregon Liquor Control Commission (O.L.C.C.) was not calculated at the county level due to pronounced change in that department's offense reporting criteria during 1984.

STATISTICAL METHODS

CALCULATION OF CRIME RATES

Quite often it is desired to compare the volume of crime occurrence, either totally or by individual offense, over a period of time for a selected group of agencies or jurisdictions. The geographical area being studied will undoubtedly consist of law enforcement agencies of various strengths and serving widely varying sizes of population. An agency equalizing factor must be developed, or in other terms, a common denominator is needed. To arrive at a valid comparison, the concept of rate is utilized.

The crime rate is defined as the number of offenses occurring per 100,000 population over a period of one year. The common denominator for any community, county, district, or state is obtained by dividing the population represented by 100,000. Once this denominator is determined, it becomes a constant until such time as the population of the community, county, district or state changes appreciably. The crime rate can be calculated then by dividing the number of offenses by the denominator.

a. Population ÷ 100,000 = common denominator

b. Number of offenses ÷ common denominator = crime rate

Example:

Agency A serves a population of 50,000 and experienced a total of 2,500 Index offenses in 1983.

Index Crime Rate -

a. $\frac{50,000 \text{ (population)}}{100,000} = 0.50$ (common denominator)

b. $\frac{2,500 \text{ (number of offenses)}}{0.50 \text{ (common denominator)}} = 5,000$ (crime rate)

Therefore, the Index crime rate for Agency A in 1983 was 5,000 offenses per 100,000 population.

Example:

Agency B serves a population of 128,750 and experienced a total of 13,500 robbery offenses in 1983.

Robbery Rate -

a. $\frac{128,750 \text{ (population)}}{100,000} = 1,2875$ (common denominator)

b. $\frac{13,500 \text{ (number of offenses)}}{1.2875 \text{ (common denominator)}} = 10,485$ (crime rate)

The robbery rate for Agency B in 1983 was 10,485 offenses per 100,000 population
